Students will have an opportunity to vote on Student Council's proposed amendments to their constitution. Voting will be open through Feb. 15.

UMR to host international college mining competition

News Services
SOURCE

Mining students from dozens of colleges and universities will converge on Rolla this spring to try their hand at old-fashioned mining techniques during the 17th Annual Intercollegiate Mining Competition.

The University of Missouri-Rolla will host the event Thursday, April 13, through Saturday, April 15, at the UMR Experimental Mine. Because the UMR team won the event last year, the cam-

pus gets to host the competition. This is the first time the event has been held at UMR.

Men's and women's "mucking" teams from each school will test their skillfulness with old-fashioned mining methods and hand-held tools. Five- to six-member teams will take part in timed events, such as gold panning, surveying, hand-mucking, hand-steeling, track-standing, Swede sawing and jackleg drilling.

Teams from campuses across the United States, as well as teams from Canada and Australia, will take part in the competition, says Ron Robison, supervisor of UMR's Experimental Mine Facility and trainer of UMR's mine res-

cue and mucking teams. "We expect between 20 and 30 teams from various universities to take part in the competition," Robison says. "Any university with a mining engineering program will more than likely take part."

UM-Rolla's team won first place in overall men's competition during the event held last spring in Elko, Nev. The UMR team finished in first place in five of the seven events held. In addition, the first UMR women's mucking team to ever compete in the event finished second in the overall women's competition. The women's team finished in first place in three of the seven events held.

Exchange programs offer mining students unique opportunity

News Services
SOURCE

nickel mines during their vacation period between semesters. The Australian institution will send two students to study at UMR and obtain industrial experience in mines in the United States.

Students participating in the program must meet all regular enrollment and academic course requirements of the host institution.

"This program will give students a chance to receive at least some of their education in a foreign country," says Dr. John W. Wilson, UMR chair and professor of mining engineering who spearheaded the exchange. "It is the best way for young people to learn and experience the ways of people from other countries."

Students in the program will earn credit for the courses they

take "and will get practical experience in a world class mining area where gold mining has been in existence for over one hundred years," Wilson says.

The first two UMR undergraduate students will go to Australia in July, and the exchange program may involve faculty members from each institution in the future, Wilson says.

UMR's mining engineering department is creating a similar academic exchange program with the University of Witwatersrand in Johannesburg, South Africa. That program should be in place by the end of 1995, Wilson says.

For information about the exchange programs, contact Wilson at (314) 341-4776.

"Breathe Free" smoking cessation class offered

Student Health
Services
SOURCE

Student Health Services is sponsoring a "Breathe Free" Smoking Cessation class on campus. The class will meet for 8 sessions starting February 14. The course uses a control booklet and motivation techniques. The class will also cover physiology of some body functions and healthy living concepts to enhance the ability to use willpower for deci-

sion making.

The class will meet Feb. 14, 16, 19, 20, 21, 22, 23, & 28 from 6:30 - 8:00 p.m. in 210 McNutt Hall. The \$25.00 registration fee is returned after completion of all 8 sessions. The facilitator of the class is Dr. Carl James. He will be at the Wellness Bash on February 8 to answer any questions.

The "Breath Free" program has been sponsored by the Seventh Day Adventist Church since 1959. The success rate of the program is approximately 85%. The registration deadline is February 8. To register or for more information call Student Health at 341-4225.

Students from the University of Missouri-Rolla's School of Mines and Metallurgy will soon have the chance to study in Australia thanks to an academic exchange program with the Western Australia School of Mines in Kalgoorlie, Australia.

Through the program, which begins this summer, two UMR students enrolled in mining engineering will spend one semester at the Australian school. The students also will have the opportunity to work in neighboring gold and

No Day

The OPPORTUNITIES FOR UNDERGRADUATE RESEARCH EXPERIENCE program is conducted annually to provide an active form of learning for UMR undergraduates through participation in "research" as an undergraduate student. The program is open to students in any discipline.

All full time undergraduate students with a cumulative GPA greater than 2.50 are eligible. If you are interested in participating, you should see your department coordinator. Your coordinator has listings of possible projects and can recommend faculty who conduct research which includes undergraduates. You and your faculty sponsor need to discuss the potential project, come to an agreement, and submit a one page application to the office of the Vice Chancellor for Academic Affairs, 204 Parker Hall. The deadline for submitting your application is March 3, 1995.

Projects may provide academic credit (typically 3-6 hours of 300 or 390 credit) and/or payment of a stipend to a limit of \$1000. One-half of the stipend is paid at the beginning of the project and the remainder when a final report, approved by the cooperating faculty member, is submitted. Up to \$500 is made available for expendable supplies.

MISSOURI PRESS FOUNDATIONS SCHOLARSHIP

This is an opportunity for juniors, seniors, and graduate students enrolled in newspaper journalism courses Missouri four-year college and universities to apply \$2,000 scholarships

REQUIREMENTS

- Missouri Resident
- Demonstrated Interest in Community Journalism
- Have Journalistic Potential

Application available in the Student Financial Office, G-1 Parker Hall.

Application deadline: March 1, 1995.

AMERICAN CHEMICAL SOCIETY SCHOLARSHIPS FOR MINORITY STUDENTS

The American Chemical Society sponsors a scholarship program to attract African-American, American Indian, and Hispanic students into careers in chemistry, biochemistry, and chemical engineering.

- Be a current high school senior interested in study of chemistry, biochemistry, or chemical engineering and pursuing a bachelor's degree on a full-time basis.
- Be a two-year college student interested in chemical sciences and planning to transfer to a baccalaureate program after completing the two-year degree.

Missouri Miner

The *Missouri Miner* is the official publication of the students of the University of Missouri-Rolla. It is distributed each Wednesday afternoon at Rolla, Missouri and features activities of the students of UMR.

All articles, features, photographs, and illustrations published are the property of the *Missouri Miner* and may not be reproduced or published without written permission.

The *Missouri Miner* encourages comments from its readers, and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names will be withheld upon request.

Submissions for publication must be in our drop box (first floor of the Norwood Hall, Room 103) by 3:30 p.m. on the Thursday before publication. Submissions, not including personals, will be accepted through E-mail (Internet) at MINER@UMR.EDU. The *Missouri Miner* reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

The *Missouri Miner* is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

Our new staff for the 1994-1995 year:

Editor-in-Chief	Christopher Goo (364-8247)
Managing Editor	Linda Starbuck (364-1057)

Correction:

The News Department would like to apologize for an error which occurred on the front page of the January 18 Miner. In the story titled "UM Board of Curators to vote on tuition increase," a quote by Dr. Walter Johnson was placed out of context. The passage should have read as follows:

If, in fact, increases in fees actually go towards increases of faculty salaries, Dr. Johnson commented, "I don't see any indication of X percent of tuition money going to increases in salaries."

The editorial staff would like to apologize for any inconvenience this may have caused.

Opinions Anyone?

Is something bothering you? Do you have an opinion on an issue? Do you want to make a statement? The purpose of the Opinions section is to provide a place for the student body to express their views. All you have to do is submit a letter to the Missouri Miner. All submissions must have a name, student ID number, and phone number for verification. Names will be withheld upon request. Submissions for publication must be in the Managing Editor mailbox (first floor of the Norwood Hall, Room 103) by 3:30 p.m. on the Thursday before publication. Submissions will be accepted through E-mail (internet) at MINER@UMR.EDU. The Missouri Miner reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste. In the case that a letter would be edited, the writer will be contacted before publication.

The Life and Times...Til Death do Us Part

Laurie Wilman

So the saying goes, "We only have one life to live." (No, I am not referring to the soap opera.) Accordingly, we should be taking this fact to heart and doing all that carpe diem stuff (yes, I am referring to Dead Poets Society): seizing the day, jumping in puddles, avoiding tests, homework and stress in general to the best of our abilities, etc., etc. And, as can be attested to from several previous articles of mine, I also firmly believe in this practice. I refuse to be completely destroying my one chance at this life by spending every waking moment praying to the gods of Heat Transfer, Fluids, or, this week, Machine Design. (Of course, an occasional sacrifice or two probably couldn't hurt anything.)

But what if we could change all of this? What if we could rid ourselves of this burden of doing everything just the way we wanted to the first time around? What if we were somehow granted immortality?

Now, anyone who has left his dorm room in the past couple of months realizes that quite a bit in the entertainment world recently has focused heavily upon this subject. Ideas of infinite life have been haunting us for years in that sector, but last fall's "Interview with the Vampire" (which, coincidentally, has spurred me to read the book... Just a little hint here folks: when you're only a year and a couple

months away from an engineering degree, do NOT start a book that has three more immediately following it to read if you really want to get the whole story; it's VERY bad on your study habits.), and now the most recent Highlander movie which just opened in January, has done nothing but add more fuel to that eternal fire (pun intended). But after watching these and seeing their outcomes, I would have to agree with their general conclusion: immortality just isn't all it's cracked up to be.

The biggest problem I can see in living forever is at what age you remain while immortal. In "Interview," the time was determined by what age the victim was when he became a vampire, and "Highlander" says it's when you die for the first time (what a profound thought). So, technically speaking, any one of us could get hit by a vending machine delivery truck tomorrow, find out we're actually never going to die, no matter how many times we try to leap ever-so-gracefully from the smokestacks, and then be stuck at the age of 19 or whatever for the rest of eternity. This, frankly, could be hell. Can you imagine being stuck in Differential Equations until the end of the universe? Or never looking old enough to buy a liquid beverage - I have this funny feeling that the state of Missouri wouldn't issue an I.D. to you if you told them you were a young 327 years old. You would never graduate from school.

You would never get a job. You would never get married, have kids, build a huge house, have mortgage payments, work yourself until the age of 47 when you have a massive coronary and die. (Okay, so maybe immortality isn't all bad.) But, by the same token, you would be past the legal adult age and could be held completely responsible for your actions. (This kind of gives new meaning to the sentence "Life in prison without parole," doesn't it?) You would never get to retire. And, on a completely serious note, you would watch all your friends, loved ones, and goldfish perish while you never aged a day. For some folks, this might not be all that bad, but that's only for those people who aren't exceptionally attached to their goldfish. For the rest of us, however, the pain would be pretty bad, I would think.

Oh, and one other, minor technicality is that, in the case of the Highlander movies, you would spend the rest of eternity worrying not about hair loss, but of head loss. (Does the guarantee from the Hair Club for Men cover anything like that??)

Anyway, folks, that's my thoughts for the week. After all that, I'd have to go back to my usual prophecy of living every moment as if it were your last and seizing every opportunity to play with Play-Doh, do your homework in crayon, and take your goldfish for a walk.

Charles Janson

Ask Me Anything, the column that answers your questions

AAAAAAHHHHHH!!!! MAKE IT STOP!!!!

Oh, excuse me...

I was just taking a much-needed breather in this first round of tests. I hope you are all in the same hell that I am. I don't mean that in a bad way, I just hope that we are all in the same boat together (this is UMR after all). I hope my article finds you in good spirits despite the havoc being wreaked on your academic lives.

Yes, it's me, Charles "Johnny Appleseed" Janson. "New name?" you ask. Yes, after my article last week, I've been given that name. Why? Well, it appears that I planted a right powerful seed in the minds of some of my peers (all the talk about the driving and thinking combined with the stress this week).

I've got some bad news for you - I don't have any of the fun "around campus news" to share with you like I promised last week, I apologize and if you want to move on to other things I understand. For those of you who decide to stick around, thanks.

Instead, I'm gonna try to help you eliminate those First-Round Blues.

It's like this: you come back from your day of back-to-back Mickey Mat, Thermo, and EE 281 tests. You don't

feel like doing a damn thing, even though you have one more fun test the next morning. What do you do? Put on a pot of coffee, sit down, bury your head in your book and look up only long enough to see how much time you have left before the test? NO. You throw your books into the heap of dirty clothes and dishes that was once your bed and you head to the CD player... You pick out an album or song that you're especially fond of (rockin' in layman's terms), put it in, turn up the volume, and forget about the day. If you live in the dorms or an apartment, this will usually draw a reprimand and/or a crowd. I should tell you right now, that I do not advocate rule-breaking or other unapproved activities in your place of residence - you do these things at your own risk.

Once you have listened to your song(s), I recommend that you urge a group of your friends to go out and physically exert yourselves. Play football, ultimate, rugby, whatever it takes to relieve some of the stress of the day. Play until you can't possibly play anymore. Then, go get something to eat. Take your time, you've got all night.

I guess I should explain the method to my madness before I go any further: You see, I am about to tell you about

one of the most heinous test-taking methods ever known to college students (I should warn you, this is not for the timid or feint-hearted)...

Yes, I'm talking about the Cold Turkey Method.

The Cold Turkey Method (or CTM) involves great courage. Not just anyone can go out and totally blow off their tests in lieu of fun. It takes a certain character to do this with no remorse. For instance, you can't start out blowing off the test and then start having second thoughts around 10 pm the night before. You must be able to stick with your original decision no matter the consequences. But, on with the story...

After dinner, there are several ways for you to rationalize not studying for the test. Here's a couple of examples, (though I'm sure you're more than able to make up your own): "I studied all last week," or "This test is really more of a quiz than a test, and I'm ready for a quiz," or "After all this, it's a clean slate..."

When you're done rationalizing the test away, you need to decide what you want to do with the evening. A little hint: it is sort of a special occasion.

Spelunkers Plan Trip

MSM
Spelunkers
SOURCE

The MSM Spelunkers Club will be having its first organized trip of the semester on Sunday, February 12th.

Starfox

CYBERSCOPE

Hello and welcome to the first installment of CyberScope! This is a new column that will be published bi-weekly and is devoted to neat, new interesting things found on the Internet.

If you have any ideas for articles, feel free to email me with them at starfox@cs.umn.edu or drop them off at the Miner office. With the advent of the World Wide Web, many of these columns will deal with new services and other cool stuff that is provided through this valuable resource and because of this I decided to devote this first column to how to access the Web. How can you see some of the cool things out there if you don't know how to access them, right?

Well, there are basically two ways to access the Web: lynx and mosaic. I know what you are thinking: what the heck are those? Well, lynx is a browser you can use from saucer/rocket. To access this, simply type at the saucer or

The trip will be to Meremac State Park and several caves will be explored. If you are interested in going on this trip, please attend the regularly scheduled meeting on Wednesday, February 8th, at 6:00 p.m. in room 204 McNutt. No previous caving experience is needed and the club can supply helmets and lights for members. For more information, call Chris at 364-0253 or Rob at 364-3169 (ext#: 247).

rocket prompt "lynx"; it's that simple.

One of the drawbacks to using lynx is that it can't display images. Since most of the cool places out there have neat images and such, you don't nearly get the full effect. I recommend using Mosaic Netscape, but it is a little harder to access, so bear with me okay?

The first thing you have to do is start Windows 3.11. Well how do I do that, huh? Simply go to the UMRMENU and move the highlight bar down to "Windows 3.11 (*in test*)." This will boot up Windows and that's half of the battle right there. After Windows loads, go to the folder labeled "Network Access" and double-click on it. From there, click on the N icon and that will run Netscape. Now you are in! Okay, here comes the harder part in explaining all this. A lot of the time I will give you something called a URL. This is simply the address of where to

see Cyberscope, page 14

Novelties Are on the Way

Ryan Fisher
Staff Writer

a wide variety of St. Pat's Novelties from now until the Best Ever.

So if you have not been by the Puck in a while, then now is definitely the time to come up and see what we've got for you!

A complete list of all the events for St. Pat's as well as all of the rules for these events will also be available very soon. This means that your organization can begin to prepare for every activity so that you will be sure to place well overall and more importantly have a great time in the process.

So get psyched because with the Best Ever being only 36 DAZE away, there is not much time left to get ready before all the fun begins!!!!

Our '95 Novelties include:

Hats	Garters
Buttons	Sunglasses
Dice	Cards
Boxers	

Diversions

COMING SOON TO ROLLA...

Indoor Soccer Tournament: Register in the SUB office for this tournament which takes place February 11, 12 and 19. You must register by February 9 at 2 P.M. There will be prizes!

SUB Movie Series: With Honors is showing on February 10 and 11 at 7:00 and 9:00 P.M. in the Mechanical Engineering auditorium.

Bowling Tournament: March 3 from 11:00 A.M. until 2:00 P.M. Registration is required and forms can be obtained at 218 UCW.

Katsy Chapel: Watch for this comedienne coming on March 9.

St. Pat's Band: Nobody's leaking any information until the contract is

signed!

Second City: This touring comedy improv group has visited UMR for at least the last five years. Now they're back on March 29.

Comedy in April: A comedian will visit UMR every Wednesday in April, with the exception of Spring Break.

Easter Egg Hunt: April 13 from 12 midnight until 12 noon. All you have to do is show up on the grass between the Mechanical Engineering building and Parker Hall.

life in general: This band is returning to UMR for another concert. April 14, 7:30 P.M., at Centennial Hall.

--Janelle Anderson

SUBconscious

SUB's annual indoor soccer tournament starts this weekend, so stop by the SUB office to pick up a registration form. The forms are due Thursday, February 9, at noon. Tournament brackets will be available Friday, February 10, at 2pm. There will

be great prizes awarded to the winning teams!

The SUB movie this weekend is With Honors starring Joe Pesci, Brendan Fraser, Moira Kelly, Patrick Dempsey. It will be shown in ME 104 at 7 and 9 pm on Friday and Saturday.

Lucy and Ethel

The World According to Rolla

(Since Valentine's Day is slowly creeping up on us, we decided to do a little ditty on the differences between guys and gals.)

We have concluded in our 21+ years that money, entertainment, and time separate the sexes. So let's cut to the chase and dig right into this controversial topic.

MONEY

Money makes the world go round, and right now, our world is at a standstill. Have you ever noticed how you look differently at money now than you did five years ago? Take 5 dollars for instance. (We wish we could.) In Rolla, right now, you can go to Taco Hell twice on 5 dollars, provided you are not too much of a pig. Right now with 5 dollars, you can get a pretty good buzz at the Grotto, plus a game of pool. Right now (we sound like that stupid Van Halen song), you can do a lot of laundry or get a half tank of gas. What the hell are we getting at? Well, a guy would probably take that 5 and buy beer for his buddies instead of taking his woman to Taco Hell or a movie. See, this is just it. A guy will spend 50 dollars or more in East St. Louis on his buddies, but can't even take his girlfriend to a late night Denny's feeding frenzy! We speak from personal experience. The last

guy one of us dated could never find the money to take me out, but always found the money to go to the Grotto at least 3 times a week, and buy everyone else at the Grotto beer. We believe in the ERA, but this is freaking ridiculous. Ya, hold our damn car doors open, say "please" and "thank you" to us, and ya, pay for something every once in a while.

Another primo example of how women and men view money differently is that a guy will work his ass off all summer and buy this bass-bumping 4-foot speakers-100 CD changer-quadruple tape deck-with equalizer-stereo system-from hell, and think nothing of it. Whereas, a girl will buy clothes that don't really fit, "but if I could only lose 10 pounds, these jeans would look awesome," accessories, "oh, these earrings will match those socks I bought," and shoes that will only get trashed the first time she wears them to a party because her freaking boyfriend is too cheap to take her somewhere that there aren't a bunch of chunk-blowing ghouls stumbling around and into everyone.

ENTERTAINMENT

What is up with ESPN Sportscenter? Hello, there are no naked chicks announcing that the Blackhawks (we are obvious Blues fans) lost their butts again. We mean

how can guys watch game, after game, after game, after game, after game? This could be understandable if you had a couple hundred riding on these games, but just to watch for entertainment purposes??? One better than that is we have these male acquaintances that have the nerve to come over to our abode, take our god, the clicker, and change to some damn game, while we are in the midst of watching some other quality-smut-infested-sex-o-rama-gorgeous male stars program. And while taking your god, the clicker, from you, he tries to break the clicking record for how many times he can change channels while the show you are watching breaks for commercial. This drives us freaking crazy! Then he will go to relieve himself and leave the lid up. Don't you guys know that we can fall in?

A gal's typical day of television would include some romantic tear-jerker, happy-ending program, while a guy's program has to have sports/violence/nudity for him to totally satisfied. Maybe we just don't understand.

TIME

How come a guy has no concept of time when he is with his buddies?

see World, page 14

ROLLA REVIEW

Dawn Osborn

Hello all you faithful moviegoers! Since Valentine's Day is quickly approaching, it would be an excellent time to get together with your honey or good friends to go to a movie or even rent a video or two. There are alot of great movies out there, and this week I would like to review Nobody's Fool and two out on video, The Mask and Lightning Jack.

Nobody's Fool

Rating R

Running time: 112 min.

Paul Newman and Jessica Tandy star in this movie depicting the life of an old construction worker in New York trying to make up for the things gone wrong in his past. Paul Newman's performance is probably one of the best of his career. The direction and acting in this film is very good and should only be commended. At times in this movie, you can become con-

fused with the direction that it is supposed to go in. You are left thinking about the message it is trying to convey, but it leaves you with a sense of bewilderment as if it hasn't completed itself.

ON VIDEO:

The Mask

Rating PG-13

Running time: 101 min.

What can I say...this movie was great! It is a definite stress reliever for all of us out there with piles and piles of homework. How can you not laugh at Jim Carrey? Hey, he made the whole police squad spring into song and dance in the movie (not many can accomplish that, ya know)! He is a hilarious actor, and this movie is an awesome display of his vivid talent. The scenes in which he places the mask to his face are full of outstanding special effects. Then when the dog has the same opportunity, it is a scene that words can't describe. There are count-

less, unforgettable lines such as: "SMOKIN'!!!!" and "Sssomebody Sssstop Meeeee!!!!" He amazes me with his ability to have such a wide-spread range of acting capability, which makes this an all-around enjoyable movie to see again and again.

Lightning Jack

**

Rating PG-13

Running time: 96 min.

This movie is categorized as an action western and that it is. Paul Hogan stars as a farsighted Australian outlaw. Or should I say wannabe outlaw? He teams up with a mute sidekick who also wants to be a well-known outlaw in the Old West. At times this film tends to move slowly, but it does have some outstanding camera shots of the horizon and the scenery. There is a story to follow, but there could have been better directing and more realistic action.

Scott Alford

Second Time Around...

"Second Time Around..." Hmmm... what's this??? Funny name for a column. Has this poor fellow tried to write a column before, but, being overwhelmed by the cares of school and the world, he had to give it up, only to start again this semester because he thought his load might be lighter? Has this poor writer, after having his work rejected repeatedly by The New Yorker and LIFE magazines, decided that the Missouri Miner is the best place to try again?

Well, not really.... Frustrated writer? Yes! Rejected writer? No (not yet anyway)! Okay, I admit to sending a couple of jokes to Reader's Digest a number of years ago, but I don't count that as a true literary experience. (Besides, my jokes were too good for Reader's Digest. They didn't deserve them.)

The chosen title for this column reflects the fact that I am a returning student. After 10 years in the "private sector," I'm back at the academic life. Way back in '85, I took my Computer Science and Mathematics degrees and left California State University at Chico to go conquer the world (well, at least to make the big bucks in private industry). Two countries, three states, four homes and thousands of miles later, here I am --- home on the family ranch in Missouri. Now I'm enrolled in the Teacher Certification program at UMR, hopefully to begin teaching high school math and science next year. So, until my editor tells me to change the

title, or until overwhelming public outcry forces a name change, I think "Second Time Around..." will do fine.

I have to admit being back at school after a 10-year hiatus produces mixed emotions. After all, it's only been a couple of years since the Physics nightmares stopped. You know, the dreams where you discover the week of finals that you signed up for Theoretical Physics earlier in the year, and you never attended class. That wouldn't be so bad except that you're still forced to take the final.... Well, you get the idea. Why would I want to come back to that environment anyway? Is this guy a glutton for punishment?

It's scary, too, to be in classes with other students barely half my age. I can remember 15 years ago, fresh out of high school, saying "Sir" and "Ma'am" to the "old people" in a few of my night classes. Now I'm one of the "old people." The other day, a young lady called me "Sir!" Horrors! Do I look that old?! Okay, so maybe she was still potty-training when I first started university. Maybe I am old enough to be her father --- but it's still hard to adjust. The absolute worst part is to be taking classes with instructors that are younger than I am. I always assumed wisdom and knowledge came with age and experience. Now I've come to the realization that this isn't always true. That whippersnapper up there teaching knows more than I do. Good thing

Come Out & See Your
Missouri Miners!

Miner Basketball On Eight Game Skid

Carl James

Staff Writer

It was another one of those weeks for UMR's basketball Miners. They dropped two games on the road to put them in sole possession of the cellar in the MIAA. The story is the same as it has been since the loss of 6-9 junior, Jamie Brueggeman: lack of rebounding. The Miner's were severely outrebounded on both ends of the court in both of last week's games.

On Wednesday night the Miners traveled to Emporia, Kansas, to take on the Hornets of Emporia State. After playing a strong 13 minutes it looked as though the Miners had a reasonable shot to take home a victory. The Miners were playing well in most areas, including rebounding. At the 7:42 mark, the Miner's center, 6-7 sophomore Jeff Kokal, received his third personal foul and was taken out of the game. At this point, with no Miner on the floor taller than 6-5, the Hornets made an impressive run that turned out to be the difference in the game.

The run was highlighted by the spectacular three-point shooting efforts of Hornet, and Division I Kansas State transfer, Sean Robbins. Robbins was 8 for 12 from behind the stripe, usually a good distance behind the stripe. When it became obvious that the Miners inside game was hurting, UMR coach

Dale Martin, called for a 2-3 zone defense in an attempt to keep the ball on the perimeter. Instead of working for an open shot, Robbins just stepped back to NBA/International 3-point range and hit several deep, but open, shots. Martin was not pleased with his team's defense of Robbins. In a post game interview with KTTR radio, Martin said, "As smart as our guys are in the classroom, you'd think they'd go out and guard [Robbins]."

The Miners played a strong second half, shooting 50% from the field, but were unable to cut into the Emporia State lead and lost the game 87-73. The shooting percentage didn't help the Miners much though, because the Hornets got so many more shots. Emporia State pulled down 29 offensive rebounds. UMR only had 33 rebounds total.

After extending their losing streak to 7 at Emporia State, the Miners headed up to Jefferson City on Saturday for an afternoon match-up against a struggling Lincoln team. Lincoln was coming off a series of close defeats that had them tied with the Miners for last place in the MIAA at 1-8. The Miners got off to a good start, acquiring an early 6 point lead which stretched to 7 at the 6:09 mark in the first half. However, that lead came at the price of three personal fouls a piece by UMR's big men Jeff Kokal and freshman, Marc Tompkins. The tide turned and Lincoln went on a 13-0 run to take a 6

point lead at the 3:55 mark. That lead stretched to 9 by the end of the first half and things once again looked grim for UMR.

The second half wasn't any prettier for the Miners. The very physical game ended with Kokal and Tompkins fouling out with only 12 and 18 minutes of total playing time, respectively. Lincoln totally dominated the boards, outrebounding UMR 54-28. Lincoln University won the game by a score of 110-87.

Under the shadow of an 8 game losing streak, the Miners will return home on Wednesday to take on Northeast Missouri State at 7:45 in the Gale Bullman Multi-Purpose Building. The Miners are not expecting the return of Brueggeman until Saturday's road game with Northwest Missouri State, the only MIAA team to fall to UMR this season.

The Miners are trying to look on the bright side. With the hopeful return of Brueggeman, the Miners are looking to pick up some end of the season victories. The Miners are also looking further, since the team has no seniors. In that KTTR interview in Emporia, coach Martin said, "We have one of the best junior college teams on the floor." Unfortunately for the Miners right now, the MIAA is not a junior college league, and if UMR hopes to finish anywhere besides the cellar, they will need to win a few Division II games.

UMR Soccer Says "Adios" To Head Coach

UMR Soccer
News Source

The University of Missouri-Rolla will not seek to renew the contract of head soccer coach Eric Swanbeck, according to UMR athletics director Mark Mullin. The contract expires June 30, 1995.

"We feel it is in the best interest of the future development of our soccer

program to make a change in leadership," Mullin said.

Swanbeck has been the head men's and women's soccer coach at UMR since 1991. He came to UMR after two seasons as an assistant coach at Bethany College in West Virginia.

During his four years as head soccer coach at UMR, Swanbeck compiled records of 24-40-4 with the men's team and 23-44-3 with the women's team.

A search for a new soccer coach will begin soon, Mullin said.

UMR Swimmers Stroke UMSL - Ready For Regionals

Kirk Jordan
Staff Writer

The University of Missouri-Rolla's men's swim team upped their dual meet record to 7-1 this weekend with an impressive 121-65 victory over the University of Missouri-St. Louis. The Miners breezed through their last tuneup before regionals winning nine out of eleven events. Ryan Uptmor (Oklahoma City, Okla.) paced the Miners winning both the 200 yard freestyle and the 100 yard butterfly with times of 1:52.27 and 1:00.26, respectively. Bill Unzicker (Decatur, Ill.) captured a victory in the 100 yard backstroke and a second place in the 50 yard freestyle, finishing five hundredths of a second behind teammate Peter Baumstark (Chattanooga, Tenn.). Brad Cozad (Bartlesville, Okla.)

Justin Ferguson

The University of Missouri-Rolla swimming team geared up for Nationals by hosting UMSL last weekend at the UMR pool.

contributed a first in the 100 yard freestyle and a second in the 200 yard individual medley to the Miner cause. Dikan Rendic (Split, Croatia) took the 100 yard breaststroke in convincing fashion with a time of 1:04.26. Tyler Christensen (Rolla, Mo.) blew away the competition in the 500 yard freestyle finishing with a time of 5:11.44. Mark Munoz (Marshall, Mo.), Jeff Winslow (Topsham, Maine), and Dan Goldak (St. Louis, Mo.) scored second place finishes for UMR in the 200 and 1000 yard freestyle and 100 yard freestyle events. Brant Modlin (Greencastle, Ind.), Ed Midden (Springfield, Mo.), Jay Meyers (Raytown, Mo.), and Wade Haagstrom (Zionsville, Ind.) rounded out the Miner's scoring with third place finishes. The Miners are idle next weekend, but will take the team's top 17 swimmers to St. Peter's, Mo., on February 16th to compete in the Midwest Regional Championships.

Photo Of The Week

Ever think your life was going into the toilet? For one unlucky resident of Farrar House 3 it became a reality last weekend when a group of his friends relocated all his furniture to the nearest bathroom. The perplexed student returned from the UMR basketball game to find an empty room and most of his possessions perfectly arranged between the toilets, showers, and sinks. After several minutes with his jaw on the bathroom floor, he could only mutter the words, "Revenge will be mine..."

Student Council

Student Council Survey Results Are In!!

Here are the long-awaited results from last years Student Council survey. The reason the results are a bit belated is because of the immense response we got from students -- we had 1351 students respond. Student Council would like to thank all of its members who tallied these results and typed the comments -- all that hard work paid off! If you take the time to really look at the responses, you can learn a lot about student opinion. While Student Council is using the results of this survey in meetings with administration, we are preparing the next survey to be distributed later this semester.

1. Where do you live?

Residence Hall 30.5%
Fraternity/Sorority 39.9%
Off campus 29.6%

2. What year are you?

Freshmen 17.2%
Sophomore 21.3%
Junior 24.9%
Senior 30.1%
Graduate Student 6.4%

3. Which campus organization do you feel offers the most benefit to the campus?

ASUM 1.7% KMN 13.6%
Miner 16.4% StuCo 19.5%
St.Pat's 20.4% SUB 22.1%
Other 6.3%

4. What would you like to see the St. Pat's Committee put emphasis on?

36.7% Sexism
31.9% Different Religions
20.9% Disabled
20.8% Different Sexual Orientation
2.3% Other
24.9% The University should still not have a cultural education plan

11. Do you think that Freshman Engineering should be a one semester course rather than a two semester course?

Yes 75.6% No 24.4%

12. Were you satisfied with your Freshman Engineering Advisor?

Yes 35.2% No 37.8%
Did not have an advisor 27.0%

13. Would you be interested in studying in a foreign country through UM's Study Abroad Program?

yes 14.5% no 36.3%
yes, if cost were no factor 49.2%

14. Would you be willing to pay an increased computing fee in order to improve computing services on campus?

Yes 40.2% No 59.8%

15. Would you be willing to pay more for parking stickers to have

better parking?

Yes 16.6% No 49.4%
do not use parking 34.0%

16. Are you satisfied with the services provided by Student Health Services (infirmary)?

Yes 60.3% No 39.7%

17. If you are not satisfied, what do you think needs to be improved with Student Health Services?

More doctors 28.0%
Treatment by nurses/doctors 17.9%
Waiting time 19.3%
More hours 13.7%
Provide Prescriptions 17.2%
Other 3.9%

18. Would you be willing to pay an increased Health Services Fee to improve these services?

Yes 34.5% No 65.5%

19. Where do you think would be the best location for an Academic Enhancement Center to provide academic support for students?

Residence Halls 17.0%
Library 37.3%
Norwood Hall 11.7%
University Center 32.0%
Other 2.0%

20. If the library hours were extended, what time would you like to see added?

Later on weekdays 39.8%

Earlier on weekdays 8.2%
Later on Saturday 20.2%
Earlier on Sunday 29.1%
Other 2.7%

21. Would you like to see some student disciplinary matters handled by a student judicial board rather than by the Student Affairs Office?

Yes 71.3% No 28.7%

22. Which of the following campus projects do you think would be most beneficial to you and the campus? (circle all that apply)

30.6% Library addition
24.9% Build an overhead crosswalk across Hwy. 63 to the Multi-Purpose Building
9.5% Renovation of Rolla Building
24.9% New outdoor track for track meets and intramural sports
16.7% Renovation and addition to Electrical Engineering
58.5% Creating a 24 hour study/computing area
47.5% Connecting residence hall rooms and Greek houses to the campus network
42.6% Building a Student Center for activities and recreation

23. What services would you like to see provided in UCE?

31.4% TV Lounge
19.8% Electronic Message Boards
51.7% Post Office

46.9% Copy Service
45.6% Computers
3.1% Other

24. Would you be willing to have part of the game area in UCE replaced to provide some of these other services?

Yes 75.0% No 25.0%

25. If the University were to build a Student Center, what type of service would you like to see provided there? (circle all that apply)

57.3% 1. Fast Food Restaurant
47.2% 2. Social Area
21.2% 3. More Meeting Rooms
27.1% 4. Offices for Student Organizations
38.2% 5. Bowling Alley
3.8% 6. Other (write in below)

26. Would you be willing to pay to help fund a Student Center to provide more activities and recreation on campus?

Yes 51.6% No 48.4%

27. Do you think that companies other than Marriott should be allowed to sell food on campus?

Yes 94.5% No 5.5%

An article summarizing the survey comments will be coming in the next edition of the "Student Council Page" -- be looking for it!

VOTE ON THE STUDENT COUNCIL CONSTITUTION!!

Every 5 years the Student Council constitution comes up for revision, and 1994-95 is one of those years. All students vote on the Constitution because Student Council has power over student organizations and sets the structure of Student Activity Fees which all students are charged. The constitution requires a 2/3 vote consisting of 25% of the student body for passage. **VOTE AT THE FOLLOWING LOCATIONS from Feb. 1-15th!**

Hockey Puck/University Center Area 8:00 am-4:30 pm
TJ Cafeteria/Quad Cafeteria during dinner
Email coming soon
LAST DAY OF VOTING IS FEB. 15TH!!! VOTE NOW!!

StuCo Blood Drive - We Need YOU!

OK Miners, here it is...the last big reminder for the third blood drive of the 94-95 school year. The Blood Drive will be held in Centennial Hall, UCE on Wednesday and Thursday February 8th and 9th, from 11:30am-5:30pm. Why should YOU come and donate?

1. Although 95% of all people require a blood transfusion at some

time in life, only 5% of the population regularly gives blood. Give Blood to do your part!

2. There is no substitute for donated blood, only you can provide it!

3. UMR has a reputation for being the largest source of blood in our Blood Region, let's not lose our title!

4. Marriot cookies, Soda from Hebbeler Bottling, coffee, Orange

Drink from McDonald's, pizza from Alex's, Dominoes, Imo's, Little Ceasars, and Pizza Inn!

5. Coupons for free food from McDonalds and Pizza Hut!

6. Most importantly a chance to feel good about your self for having Given the Gift of Life!

Please come out and support the blood drive Help Save a Life.

THE FAR SIDE

By GARY LARSON

"Hey, Sid! Remember that time last summer we were all gathered around the kill like this, someone told a leopard joke, and you laughed so hard an antler came out your nose?"

Ralph Harrison, king of salespersons.

ROLLA LION CLUB/VANCE SCHOLARSHIP FUND

Requirements must be a high school graduate of Rolla, St. James, Newburg, Grade Point Average 3.0 or better.

Applications available in the Student Financial Aid Office, G-1 Parker Hall.

Application Deadline is: No later than April 1, 1995.

SIGMANUSTRISTANG.PINZKE MEMORIAL SCHOLARSHIP

Applicant shall be male or female enrolled in the School of Engineering at the University of Missouri-Rolla, maintaining a 2.5 cumulative grade point average on a 4.0 scale, and demonstrating leadership in campus and community activities.

Applications available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submitting application back to the Student Financial Aid Office is: February 28, 1995.

THE MID-WEST CONCRETE INDUSTRY BOARD, INC

The MCIB Educational Fund was established to provide financial aid to college engineering students pursuing a Bachelor of Science or higher degree that includes concrete and concrete design courses as an integral part of their degree program.

REQUIREMENTS:

- * Applicants permanent residence as indicated on college records or the high school or record must be with the states of Kansas or Missouri and either (a) within a 150-mile radius from a point on the Kansas/Missouri state line at highway I-35; or (b) within a 25 mile radius of the main U.S. Post Office at the mailing address of a current MCIB member.
- * Applicant must be pursuing a Bachelor of Science or higher degree that includes concrete and concrete design courses as an integral part of their degree program at an accredited college or university.
- * Applicant must be enrolled in or have completed concrete or concrete design courses.
- * Applicant must not be a son, daughter, grandson, granddaughter, niece, or nephew of an Advisory Committee member.
- * Part-time student applicants will be limited to junior class status or above. The scholarship award to part-time students will be commensurate with the cost.
- * (a) A statement of appraisal of the applicant in terms of potential for growth, character, leadership capacity, and career interest from three evaluators is required; at least one should be from a faculty member. The statements of appraisal must be returned directly to MCIB by each evaluator. Recommendations sent to MCIB by the applicant will not be accepted.

Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline: April 30, 1995.

THE JOHN GYLES EDUCATION FUND

The John Gyles Education Fund is again this year offering financial assistance to students in both Canada and the United States. Canadian or American citizenship is a requirement. Awards are available for all areas of post-secondary study. A minimum GPA of 2.7 is required. Criteria other than strictly academic and financial need are considered in the selection process. Selected students will receive up to \$2,500.00. Deadlines for 1995 are April 15th, June 15th, and November 30th. Applicants must be mailed by these dates.

Students may receive an application by sending their requests along with a self-addressed, stamped (US 32 cents) No. 10 envelope to: The John Gyles Education Fund, Attention: R. James Cougle, Administrator, P. O. Box 4808, 712 Riverside Drive, Fredericton, New Brunswick, Canada E3B 5G4

NATIONAL SOCIETY OF PUBLIC ACCOUNTANTS SCHOLARSHIP FOUNDATION

Who can apply? Full time undergraduate students enrolled in a degree program at an accredited 2- or 4-year college or university who are majoring in accounting with at least a "B" or better grade point average.

Applications and more information on scholarship is available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is March 10, 1995.

DESK & DERRICK EDUCATIONAL TRUST

To be eligible for a scholarship from the Desk and Derrick Educational Trust application must meet the following criteria:

- * Applicant has completed at least two years or is currently in the second year of undergraduate study at a fully accredited college or university.
- * Applicant has maintained a grade point average of 3.0 or above on a 4.0 grading system.
- * Applicant has demonstrated need for financial assistance in pursuing a college degree.
- * Applicant is a citizen of Canada or the United States.
- * Applicant plans a career in the petroleum or an allied industry.

Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is: April 1, 1995.

INDIANAPOLIS, Jan. 7 — The Indiana University Center on Philanthropy is seeking student applicants for its Jane Addams Fellowships in Philanthropy program. The fellowship program awards each fellow \$15,000 for the year and 12 credits toward graduate degree. Applicant deadline is February 17, 1995.

Qualified candidates will be recent graduates with a bachelor's degree, including seniors anticipating graduation. Applicants must show demonstrated leadership potential, special interest in some aspect of community service, and academic stability. The program is not intended for students who are already committed to a program of graduate study.

Jane Addams, founder of Chicago's famed Hull House and noted social reformer, devoted her life to community service and philanthropy. Created in the spirit of Jane Addams, the program encourages aspiring leaders to work for the common good while studying and investigating the roles of philanthropy. In addition to guided study, students will select an internship with a nonprofit organization in the Indianapolis community.

Interested persons should contact the IU Center on Philanthropy, 550 West North Street, Suite 301, Indianapolis, IN 46202, (317) 274-4200.

The NAWIC Founder's Scholarships are offered to men and women who are pursuing degrees in fields related to the construction industry. Applicants must be enrolled full-time in a course of study leading to a degree/certification in a construction-oriented field. Applicant will be considered on the basis of interest in construction, grades, extra-curricular activities, employment experience, advisor's evaluation and financial need. Applications are available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is: postmarked by February 1, 1995.

The St. Louis NAWIC Scholarship is offered to men and women who are pursuing degrees in fields related to the construction industry. Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is April 1, 1995.

Who can apply Full time undergraduate students enrolled in a degree program at an accredited 2- or 4-year college or university who are majoring in accounting with at least a "B" or better grade point average.

Applicants and more information on scholarships is available in the student financial aid office, G-1 Parker Hall. Application deadline is March 10, 1995.

Applications for the C.J. Grimm Scholarship are now available to engineering students. To be eligible students must be in the upper one fourth of their class and be juniors or seniors who are progressing satisfactorily toward a baccalaureate degree in engineering. Financial need is not to be considered. Applications available in the Student Financial Aid Office, G-1

Parker Hall. Application Deadline is February 1, 1995.

This competition recognizes exceptional achievements, as well as the vision, determination and academic scholarships awarded annually to worthy full-time students enrolled at institutions, including accredited tradeschools, offering degree programs in manufacturing engineering or manufacturing engineering technology. Must have completed a minimum of 30 college credit hours. Students must possess an overall minimum grade point average of 3.5 on a 4.0 scale. Information available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission: March 1, 1995.

The William E. Weisel Fund, through the SME Education Foundation, will support one scholarship awarded annually to a worthy full-time student seeking a career in robotics/automated systems. Applicants must have completed a minimum of 30 college credit hours. Must also possess an overall minimum grade point average of 3.5 on a 4.0 scale. Information available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission: March 1, 1995.

The Wayne Kay Scholarship Fund, through the SME Education Foundation, will support fellowships awarded annually to worthy full-time students enrolled in a graduate program for manufacturing engineering or manufacturing engineering technology.

Fellowships awards are made only to those students who have proven scholastic ability, exemplary character and leadership capability and who have demonstrated their potential for future leadership in the profession. Graduate fellowship applicants must possess an overall min. grade point average of 3.5 on a 4.0 scale. Information available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission: March 1, 1995.

Proceeds from the TWA Scholarship Funds will be distributed to two law students (\$3,000 each) selected by the law schools and to four additional students (\$6,000 each) selected by a University-wide selection committee. Law students may also apply for a scholarship through the University-wide competition.

Eligibility: Students must be residents of the state of Missouri. Eligibility: Any women who is a full-time junior (third year of undergraduate study) at an accredited college or university for the 1994-95 academic year is eligible to enter. Application deadline is January 31, 1995.

Requirements must be a high school graduate of Rolla, St. James, Newburg. Grade Point Average 3.0 or better. Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is no later than April 1, 1995.

Applicants must be full-time students who have completed 30 credit hours and be enrolled in manufacturing engineering, or manufacturing engineering technology program. A minimum overall grade point average of 3.5 on a 4.0 scale is required. Supports five scholarships of \$750 each for 1995 students. Information available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission is March 1, 1995.

The Caterpillar Scholars Award Fund, sponsored by Caterpillar, Inc. will support scholarships awarded to worthy full-time students enrolled in degree programs in manufacturing engineering technology. Must have completed a minimum of 30 college credit hours. A minimum of 3.5 on a 4.0 scale is required. Information available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission is March 1, 1995.

The Wayne Kay Scholarship Fund, through the SME Education Foundation, will support scholarships awarded annually to worthy full-time students enrolled in a degree program in manufacturing engineering or manufacturing engineering technology. Must have a minimum of 30 college credit hours. Scholarship applicants must possess an overall minimum grade point average of 3.5 on a 4.0 scale. Information

available in the Student Financial Aid Office, G-1 Parker Hall. Deadline for submission: March 1, 1995.

The Myrtle and Earl Walker Scholarship Fund, through the SME Education Foundation, will support of Missouri as defined by the rules of the Board of Curators (see attached Factual Criteria Sheet). Graduate and undergraduate applicants must be currently enrolled or accepted for admissions to an academic program at the University of Missouri in environmental engineering or environmental science. Graduate students are eligible at any level; undergraduate students must have completed 60 hours of college course work, not necessarily at the University of Missouri. Law students who intend to pursue a career in the area of natural resources or environmental law are eligible. Prior TWA Scholarship recipients are eligible to reapply. Applicants will be evaluated on the basis of grade point average, GRE scores (where available), research, and other relevant experience. Applications available in the Student Financial Aid Office. Deadline forward to office of the Vice President for Academic Affairs, 518 Clark Hall, University of Missouri-Columbia. Application deadline is March 15, 1995.

The Hispanic Scholarship Fund was established in 1995 to invest in the young Hispanic people of the Greater Kansas City Area by providing grants to both entering and continuing college students. The primary focus is to assist those Hispanics living in the area with the largest concentration of Hispanic residents, generally said to be the Argentine and Amourdale Communities in Kansas and the Westside neighborhood in Missouri.

- The applicant must exhibit proven academic merit (as reflected in GPA and answer to essay question), financial need (as exhibited by family's gross income, size of family, and other financial need), and community involvement (as reflected in the application).
- The applicant is a permanent resident of the Greater Kansas City Metropolitan Area and is a United States citizen or lawful United States Resident.
- The applicant has been accepted or is enrolled in a fully accredited college or university and is working toward an associate, bachelor, or graduate degree. (Applicants attending vocational or trades schools are not eligible).
- The applicant must be enrolled as a full-time student (minimum of 12 credit hours).
- Applicants must be Hispanic. The objective of this program is to provide financial assistance to Hispanic Americans.

Applications available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline: March 3, 1995.

Each year the American Electroplaters and Surface Finishers Society offers scholarships to upper class undergraduate and graduate students who are interested in careers in the careers in the surface finishing field.

Criteria:

Undergraduate students must be studying in metallurgy, metallurgical engineering, materials science, or engineering, chemistry, chemical engineering, or environmental engineering.

Selection factors include achievement, scholarship potential, motivation and interest in the finishing technologies.

Must be a full-time student during the academic year the scholarship is received.

Financial need is not a factor. Application available in the Student Financial Aid Office, G-1 Parker Hall. Deadline requested documents must be postmarked by April 15, 1995.

This is an opportunity for juniors, seniors and graduate students enrolled in newspaper journalism courses a Missouri four-year college and universities to apply for \$2,000 scholarships.

Requirements:

- Missouri resident
- Demonstrated Interest in Community Journalism
- Have Journalistic Potential
- Application available in the Student Financial Aid Office, G-1 Parker Hall. Application deadline is March 1, 1995.

Four scholarships will be awarded: on graduate levels scholarship - \$600; one undergraduate level scholarship - \$500; two for elementary, high school or youth group project - \$250 each.

The graduate applicant must be enrolled in a field of study related to natural science and earth resources in an accredited college or university. Undergraduate applicants must be 60 credit hours or more and should be enrolled in areas related to the field of conservation. Preferences in all cases will be given to applicants enrolled in Missouri schools. For application forms write: Charles P. Bell Scholarship, Conservation Federation of Missouri, 728 W. Main, Jefferson City, MO 65101 or call 314-634-2322 or 1-800-575-2322. All applications are due by February 1, 1995.

Who can apply Full time undergraduate students enrolled in a degree program at an accredited 2- or 4-year college or university who are majoring in accounting with at least a "B" or better grade point average.

Applicants and more information on scholarships is available in the student financial aid office, G-1 Parker Hall. Application deadline is March 10, 1995.

Real Astrology for an Unreal World

ARIES (Mar. 21-Apr. 19): It would be a good week to bring meals to shut-ins or donate your old laptop to a single mother. Oddly enough, it would also be an excellent time to scratch and claw for a bigger market share or to stage a takeover of a competitor. That's the strange thing about this week. Capitalist-style voracity and bleeding heart compassion can not only coexist --they'll actually have a mysterious symbiotic relationship. The more toys you donate to homeless kids, the more Brownie points you'll earn with people who have money to burn.

TAURUS (Apr. 20-May 20): Astrologer Skip Fickling studied over 100,000 birth and death records and found that the sign with the longest average life span is... Taurus! According to his statistics, you bulls live an average of 81 years. Why? Because you treat your bodies like temples, because you're skilled in the arts of relaxation and because you're picky and savvy about the risks you take. Most of all, I suspect, you persist in practicing these excellent habits even when you're under the most insidious stress -- like now, for instance. Right?

GEMINI (May 21-June 20): After snaking your way through so many of life's bitchy pleasures these past few weeks, you're probably ripe for some of life's beach-y pleasures. How 'bout it? Nothing like a day at the beach in midwinter to wash away the aftertaste of all those rich, grimy complications.

A week at the beach would be even better.

If there's a lake shore or riverside or seacoast near where you live, get thee hence A.S.A.P. If there's not, consider cashing in your sick leave and fleeing to some distant paradise. Or please at least gaze into a coffee table book full of sexy pictures of sky, sea, and sand. (Internet surfers: Check out this new newsgroup file: alt.culture.beaches.)

CANCER (June 21-July 22): Jinxes smashed! Bewitchments undone! Wounds soothed! Wake up and smell the incense, Cancerians: You are now the living embodiment of a lucky charm. At no other time in recent memory have you had so much power to reverse the effects of hexes, bad habits, and just plain negative vibes. Your hands and eyes are charged with good medicine. Other parts of you are, too, which means sexual healing could be in the works. But before you embark on your mission to cure everyone you love, remember the first law of the soul doctor: "Physician, heal thyself."

LEO (July 23-Aug. 22): Valentine's Day is thought by historians to be a tame, Christianized version of Lupercalia, the orgiastic festival of ancient Rome. Falling on the first of February, Lupercalia marked the halfway point between the winter solstice and the spring equinox. Erotic games and sex rituals were the order of the day. The pagans believed, as I do, that

the waxing of the sun's light and warmth coincided with a mass hormonal awakening among humans. February, in fact, was named after Juno Februata, goddess of the "fever" (febris) of love. Now it just so happens that from an astrological point of view, no one is more subject to this fever than Leos. The beginning of February almost always brings a gushing surge in your romantic yearnings and possibilities--and this year is no exception.

VIRGO (Aug. 23-Sept. 22): It would be a good week to sing "Who's Afraid of the Big Bad Wolf?" in the shower, in the car, and even (under your breath) on the job. It might even be a good week to suck up to the wolf a little. But it wouldn't be such a great time to imitate the wolf, buy the wolf's wares, or take on the wolf's values.

On the other hand, it would be a propitious time, believe it or not, to take a few cues from the donkey. Be willing to be a beast of burden in a good cause, but be a stubborn ass if pushed too far.

LIBRA (Sept. 23-Oct. 22): Are you just the slightest, tiniest, wee bit bored with the progress of your collaborative projects -- especially those of a romantic nature? I hope so. The more bored you are, the more likely it is you'll get riled up enough to do something about it. In my expert opinion, Libra, togetherness urgently needs more daredevilry, not to mention slapstick. So add a pinch of jalapeno sauce

to your love potion, please, and drink a toast to riotous, unsentimental AMOUR. Slip a rubber snake into the carnal bed to test the waters, and if the response is good, haul out a Leather Butterfly or Hitachi Double-headed massager.

SCORPIO (Oct. 23 -Nov. 21): Forget Martha Stewart. Skip "Architectural Digest" and "Metropolitan Home." You don't need the experts' advice on how to spiff up your digs. Your own natural instincts for home improvements are now at an all-time high --as are your hunches on how to jack up domestic bliss to record levels. G'wan, get started today. What previously forbidden household items could you get away with smuggling in now? What potted plants and wall-hangings and subliminal additions would sweeten everyone's moods? Ready. Set. Move the furniture, rearrange the decor, and make love on the kitchen table.

SAGITTARIUS (Nov. 22-Dec. 21): As the Chinese Year of the Pig begins, let's set the record straight about that much maligned beast. It's true that pigs will eat any old slop thrown their way they prefer to dine on finger foods. Unlike most humans, furthermore, pigs barely eat more than they need.

So what's this have to do with you/ Everything. During the Year of the Pigs, you definitely will not have to accept any old slop thrown your

way. In fact, you'll see far more prime cuts than you could possibly heap on your plate. So be very selective, and try hard not to gorge until you're glutted or bloated.

CAPRICORN (Dec. 22-Jan. 19): The reality check is in the mail. I promise it won't bounce as long as you scurry around madly building up your karmic credit before it arrives.

You might, for instance, make atonement to a person you've always acted superior to. You could try refining a skill you've always pretended to be better at than you really are. Or you might question whether people are only telling you what you want to hear--and then decide to pay someone to tell you the truth.

AQUARIUS (Jan. 20-Feb. 18): If I were a goofy pop-psychologist, I might interpret current astrological omens to be telling you to buy a huge erector set for your inner child. If, on the other hand, I were a Scorpio alchemist, I might whisper "figure out which lead can be turned into gold, and get rid of the rest of the lead." If I were a crazy poet, I might bellow "don't give anything unless you can give everything."

And if I were the mystic mathematician, Ralph Abraham, I'd say "heart physiologists find more chaos in the healthy heart than in the sick heart."

PISCES (Feb. 19-Mar. 20): Saturn has been in your sign since January 1994,

Cyberscope

from page 5

locate what I am talking about. For
example, the URL for my homepage is
<http://www.cs.umn.edu/~starfox>. If
you go to File under Netscape and
select "Open URL" and type that, it
will load up my homepage for you.
From there you can click on any blue
text and have it take you elsewhere.
Not to fear, though, if you go some-
where you didn't intend to or merely
want to backtrack and take another

link, Netscape has a "Back" key that
you can click on and it will take you to
the previous link.

Well, I think that's enough confu-
sion for one article. If you still have
trouble accessing all of this, email
helpdesk@umr.edu, and I am sure they
will help clear up any problems for you.
Next Time: IUMA's ultra cool Web
service!

World

from page 6

He can stay up all night, until like 6 or
7 a.m., drinking with his buds, and then
whine about how he doesn't feel good
the next day because he has a hangover
or he's just sooo tired. Well, Boo-Hoo!
Or one better, he'll call you at about 3
or 4 in the morning, wanting to come
over for a little "snuggling?" What,
there weren't phones at midnight?
When guys are with guys, they act like
pigs that don't wear watches.

Girls make the time to see their
man. They will get all their crap done,
so they can spend time with their man,
even though he is out drinking with his
friends, Mr. Budweiser or Mr. Jim
Beam.

OK, we are being too hard on that
precious male ego. How about those

materialistic wenches who measure
their significant other's like/love for
them by the number of times they get
flowers or taken out to dinner? Hey,
fellas, most, well *hopefully* most, gals
don't care about how much money is in
your wallet. All we care about is the
size of your heart and how you express
yourself to us.

Just remember that Valentine's
Day is around the corner, and your
girlfriend, friend that is a girl, mother,
or sister doesn't expect a 50 dollar
bouquet of flowers or a 10pound box of
chocolates that will make her butt ex-
pand to the size of Texas. All she want
is you, and some of your precious
TIME, and a little bit of your HEART.

Ask

from page 5

sion, so make it worthwhile. Find
things to do that you normally
wouldn't; this also helps pass the time
faster. After you've had your fun, go to
bed early - chances are, it was a long
day and you'll need your rest.

Now, for the trickiest part... As you
go off to the test the next day, don't
think about the impending doom. In-
stead, focus on the relaxation and the
fun you had the night before - it'll
provide for a better test-taking atti-
tude.

Before I go, I must tell you that I do
not advocate CTM to anyone at any-

time. However, I happen to know of a
person who has practiced CTM and
one who is practicing CTM at this
moment (I'll be happy to relate his
performance in the next issue). Inci-
dentally, the same person that has tried
it in the past is practicing it now. Why?
He met with marginal success and
hopes for it again...

Next week, I promise that I'll have
a real story or two for you. If you have
a question or something you think is
interesting enough for me to investi-
gate, let me know. I'm at
janson@umr.edu

Stars

from page 13

and will continue to be till April, 1996.
Some traditional astrologers, for whom
Saturn is a dour agent of limitation,
might tell you that this is a time for
downsizing and self-denial. They'd
encourage you to be discouraged. I take
a different tack. I say that if you
cooperate with Saturn it'll help you
flush away your flaky, flighty tenden-
cies and force you to be more focused.

It's true that Saturn can be an en-
emy if you ignore its commands to
become yourself. But respond to it
gamely and it'll be your very best
friend.

--Rob Breznsky

Second

from page 6

I like the class.... It allows me to be
magnanimous and let the age issue
slide.

So, why the column? Hey, can I
help it that it sounds like fun? I mean,
to be paid to ramble! Not that I really
have a lot of extra time (my wife can
attest to that), but this is an opportunity
too good to pass. As stated before, I am
a frustrated writer. I've tried a couple
of times to start that bestselling novel,
but just never seem to have the time to
really get it going. This column pro-
vides the opportunity to actually see
something completed. And, unless my
dear, wonderful, intelligent, caring (is
that enough flattery?) editor cuts me

out, perhaps I'll see something pub-
lished. Who knows, maybe this is the
springboard to a distinguished writing
career. (When you do open that *New
Yorker* magazine and see my name,
you can always say you saw it here
first.) Or, more likely, this may just be
a way to blow off steam every week or
so. Some students down their school
frustrations in yellow (or green) liquid
with a froth. Not me, I prefer to keep all
my brain cells that I so carefully fill
with all this great information, so
maybe I'll vent the post-mid-term frus-
trations by writing. I do promise,
though, not to whine (well, maybe just
a little).

Stay tuned for the continuing
thoughts of a returning student.

DID YOU KNOW... That there is
a Teacher Certification program at
UMR? A lot of students I meet express
surprise that I am able to pursue a
teaching certificate here. If you're in-
terested in Teacher Certification your-
self, contact Dr. EvaLee Lasater, H-SS,
room 234 (ph. 341-4692).

DON'T FORGET... To give
blood this week: Wednesday and
Thursday, February 8th and 9th, from
11:30 a.m. to 5:30 p.m. in Centennial
Hall (second floor, University Center-
East). Give Blood For Life!

SDG

Surprise Teams Heating Up NHL Ice M-Club Athlete of the Week

Mark Lewandowski
Staff Writer

Some of the National Hockey League's brightest stars are off to slow starts giving room for a few new ones to emerge. Last seasons super teams are looking up from the bottom of their respected divisions. Teams such as San Jose, Quebec, New York Islanders, Anaheim, and Florida are fighting for the division lead. This lockout shortened season has certainly produced many surprises.

Last year's Stanley Cup Champion New York Rangers have just two wins putting them only two points out of the basement in the Atlantic division. The Vancouver Canucks, last year's Western Conference Champs, have only one victory. The 1994 New Jersey Devils

started off with a team record of 9-1-1 and this year they can only muster up eleven goals in seven games.

On account of these falters the Quebec Nordiques has posted an 8-1 record, allowing only thirteen goals due to the surprisingly hot goaltender Stephane Fiset. The Pittsburgh Penguins are undefeated and the NY Islanders are atop the Atlantic division. The former expansion teams have played well with San Jose and Anaheim fighting for the division lead in the Pacific division. San Jose leads the NHL in goals against allowing a mere eleven goals in eight games.

Not only are teams faltering, but players such as Wayne Gretzky, Doug Gilmour, and Pavel Bure are off to slow starts. Bure, who scored sixty goals each of the last two seasons, has only three goals in seven games. Players off to unusual fast starts are Winnipeg's Keith Tkachuk who has twelve points, Joe Murphy of Chicago

is averaging a goal a game. Even Ray Sheppard is out gunning teammates and perennial snipers Sergie Federov and Steve Yzerman with eleven points.

Now a little about the home team. St. Louis has just acquired another former Stanley Cup Player in Glenn Anderson. Anderson has five rings and ranks fourth among points in the play-offs with 207. This experience should only add to the Blues already potent offense. Look for a heated battle through the whole season between Detroit, St. Louis, and Chicago in the race for the top spot in the Central division and the whole Western Conference.

NHL Scoring Leaders

Name	GP	G	A	PTS
Hull, StL	8	9	5	14
Sokic, Que	7	4	9	13
TkAchuck, Win	8	7	5	12
Selanne, Win	8	5	7	12
Tikanen, StL	8	4	8	12

Justin Ferguson

Bill Unzicker, a member of the UMR swim team is this weeks M-Club Athlete of the Week. Bill is a sophomore from Decatur, Illinois, and is majoring in Chemical Engineering. The swim team competed in an invitational with six other schools at Washington University. Bill placed first in the 200yd butterfly, first in the mile freestyle, and first in the 400yd Individual medley, where he only finished 1.9 seconds behind a pool record. Brad Cozad, Rob Heigan, Dikan Rendic, and Bill placed 2nd in the 800yd Freestyle Relay, only 0.19 seconds out of first place. To finish off Bill's outstanding meet, he was the high point swimmer, claiming all sixty points possible. Congratulations Bill and good luck to you at Nationals.

Hick's College Basketball Report and Top 22

David Hicks
Staff Writer

Carolina plays Maryland this week, which will either tie up the ACC or put NC way ahead of the rest. NC is at the top here too since Maryland's poor showing versus Georgia Tech, 100-91 GT.

There was more shuffling in the ranks other than the top 5. Syracuse lost to Kentucky dropping them a spot or two and Arkansas' problems persist losing to an extremely tough Mississippi State team, 83-62. Iowa St., who was looking quite impressive has all but left the Top 22. With losses to Kansas, Missouri, and Oklahoma consecutively, the Buckeyes are dropping swiftly. Georgetown suffered 2 losses - Syracuse and Miami.

Some teams showing promise as March draws near include Minnesota, Oregon, Purdue, and Mississippi State. Look for these teams to put wrinkles in some top-ranked teams' plans to win a conference title or even a National Title.

Now it's time to revise my Final Four picks from the preseason. I think it's obvious Kansas, Kentucky, and UMass will be there, but the fourth of the four could be any of the following: N. Carolina, UConn, UCLA, Arkansas, or even maybe Syracuse. But I

believe in Wooden magic - my 4th pick UCLA. There's one thing about this year's tournament, all of the teams will be extremely competitive more so than last year. Only 40 days left til the best ever NCAA tournament 1995.

HICKS' TOP 22

1. N. Carolina
2. Kansas
3. Kentucky
4. UConn
5. UMass
6. UCLA
7. Michigan St.
8. Arizona
9. Maryland
10. Syracuse
11. Missouri
12. Georgia Tech
13. Arkansas
14. Wake Forest
15. Virginia
16. Stanford
17. Arizona St.
18. Mississippi St.
19. Oregon
20. Purdue
21. Minnesota
22. Iowa St.

Intramural Update

A by-law change was made at the last meeting. Its purpose was to clarify who was eligible to play intramural sports. It stated that any person who has lettered in varsity athletics is forever ineligible to play that intramural sport. Any person who is practicing with the varsity team is ineligible to play that intramural sport during the same season (or school year, if the seasons do not coincide). Any person who tried out for a varsity team and got cut is eligible to play that same season (or year) in intramural athletics.

Wheew... The Athlete of the Week is Barclay Nothouse from Kappa Sigma basketball. The Team of the Week is Tribe basketball. Congratulations to both.

Bowling entries will be due by 8:00 pm Feb. 15 in the drop box. There will be a Division I and Women's Captain's meeting Feb. 7 at 6:00 pm in the classroom. Schedules will be given out at the meeting.

I sincerely apologize to Women's intramurals for not including their Athlete and Team of the Week. I will attempt to do better.

If any member or an organization gets a picture of a game that would look good in the paper, give it to your IMA representative to give to me. We will try to get pictures in the paper, but I can't publish a picture I don't have.

Good luck to all D1 and Women's basketball teams!

■ Jason Carter, IMA Secretary

UMR PARENTS ASSOCIATION

The UMR Parents Association is soliciting your ideas about possible new programs and improvements to existing programs. The projects now sponsored by the Parents Association are:

1. Educational Assurance Grants - Up to \$1,000 per semester in emergency aid is provided to students whose mother or father dies while the student is enrolled at UMR.
2. "Starting Points" Guide for Parents - Given to parents at orientation sessions, this sheet provides helpful advice and campus phone numbers.
3. Contact Lists for Incoming Freshmen - Incoming freshmen are provided with names/addresses/phone numbers of other incoming freshmen in their geographic area to facilitate making contacts and arranging rides.
4. Student Affairs Newsletter - Mailed to parents each semester, this publication contains news and information from the UMR Parents Association, as well as from campus departments.
5. Magazines for Health Center - Subscriptions to 16 magazines for the health center waiting room are provided.
6. Outstanding Graduate Teaching Assistant Award - Selection is based on student course evaluations. The award consists of a certificate of recognition and appreciation, and a \$500 stipend.
7. Parent(s) of the Year Award - Selection is based on nominations solicited by the Student Council from the student body.
8. Freshman Advisor Banquet - Freshman advisors receive certificates of appreciation and pins recognizing their years of service.
9. "Buy a Brick, Build a Future" Campaign - Personalized bricks are being sold in order to raise \$100,000 to help complete the Student Recreation and Intramural Center.

YOUR IDEAS ARE NEEDED!

I would like the UMR Parents Association to consider the following program expansion/improvement(s):

NAME _____ ROLLA PHONE # _____

(Please take or mail completed form to Lindsay Bagnall, Parents' Office, 114 Castleman Hall, UMR, Rolla, MO 65401)
